THE HISTORY OF IRWIN TOOLS

IRWIN Tools has a long and storied history, stretching for more than a century and set against the backdrop of a young, ambitious nation. In 1885, Charles Irwin patented the Auger bit and, along with four business partners, formed the IRWIN Auger Bit Company. In 1924, William Petersen, a Danish immigrant, invented and patented VISE-GRIP® Locking Pliers. Through innovation and a series of acquisitions, these two companies have now become IRWIN Tools.

IRWIN Tools manufactures and distributes a broad line of hand tools and power tool accessories including JACK® handsaws, RECORD® clamping and locking tools, VISE-GRIP® pliers and wrenches, JORAN® drill bits, QUICK-GRIP® clamping tools, MARPLES® chisels and woodworking tools, and UNIBIT® drill bits.

The IRWIN Bit

IRWIN® INNOVATION

Innovation is the hallmark of IRWIN®. For more than 100 years, it's been an idea that has permeated the culture of our company, and it continues to drive everything we do. Beginning in 1885 with development of the first IRWIN® auger bit, and progressing with the introduction of Vise-Grip® locking tools, Blue Groove flat bits, and Quick-Grip® bar clamps, IRWIN® has been at the forefront of the industry, creating better tools in a better way. Our impressive track record of new product development is born from our passion for understanding the needs of our primary user – the professional tradesman. This dedication to improving products begins in the field, where IRWIN®'s specialised end-user teams visit construction sites. There, the IRWIN® Field Product Specialist team learns first-hand – from the professional – how to improve our products, and how to make the pro's job easier and more productive. This hard-earned knowledge is the foundation for a unique product development process utilised by IRWIN®'s engineering, marketing, and manufacturing teams to deliver a continuous stream of new products to the marketplace. Supported by a global network of world-class manufacturing facilities and bolstered by our partnerships with leading global retailers, IRWIN® continuously sets the professional standard in each and every market segment in which we compete. From product feedback and development to distribution and use in the field, we dedicate ourselves to delivering quality tools that meet the stringent requirements of our toughest critics – professional tradesmen.

IRWIN®
UNIVERSITY

IRWIN® is committed to the pursuit of developing tools to get the job done right. Our commitment extends beyond our broad assortment of innovative IRWIN® products to include the development of our employees and valued customers. We are dedicated to delivering best-in-class career and industry development opportunities through a variety of product training programs.

INSTRUCTOR-LED PRODUCT TRAINING

The IRWIN® University is a state-of-the-art facility dedicated to IRWIN® product development and training. IRWIN® employees participate in a variety of multi-day training programs led by highly skilled facilitators to expand their knowledge of IRWIN® hand tools and power tool accessories. These hands-on courses range from introductory product knowledge overviews to more advanced curriculum including jobsite assessment, phases of construction, and hands-on, real-world product applications.

IRWIN®
DESIGN CENTRES

IRWIN® has been delivering high-quality and innovative products for over a century. The experience and knowledge to design and build the IRWIN® products with rigorous testing and quality control are fundamental parts in our ability to offer the best products. Our testing centre facilities across the globe ensure exactly that.
The centres opposite use the very latest technology and testing methods within their specific areas of expertise.

VISE-GRIP®

The VISE-GRIP® Locking Tool was invented in the 1924 by a blacksmith in a small town of DeWitt, Nebraska. William Petersen was a Danish immigrant who invented the first locking pliers in his blacksmith shop, and began selling them from the back of his car to farmers and people in surrounding towns. He patented his new idea and called it VISE-GRIP®.

Since then, VISE-GRIP® has gained global brand recognition as the first choice for Locking Pliers. Innovation and quality are the core values of the VISE-GRIP® brand. With proven performance in every turn, these are the tools that tradesmen choose first – and pass on to the next generation.

The IRWIN® VISE-GRIP® family offers a full line of locking pliers, water pump & VDE Pliers, certified by TÜV. IRWIN® VISE-GRIP® pliers and wrenches continue to set the standard for dependability, quality, and innovation… today and tomorrow. Wherever there's a need for a quality tool, IRWIN® VISE-GRIP® is on the job.

Record®

Originally established in 1898 in the South Yorkshire city of Sheffield in the UK. The Record Tools Factory was swiftly able to make a long lasting contribution to the worldwide reputation of the region for the manufacture of high quality steel and castings.

The Record® brand name was introduced in 1909 and by the 1920's the product range had expanded into Vices, Planes, Clamps and Pipe Wrenches enabling the business to grow rapidly in the UK and many overseas markets.

Today, IRWIN® Record® continues excelling by sticking to the traditional values set by its founders, producing tools that are highly valued amongst professional users for quality and durability that remains strong today.

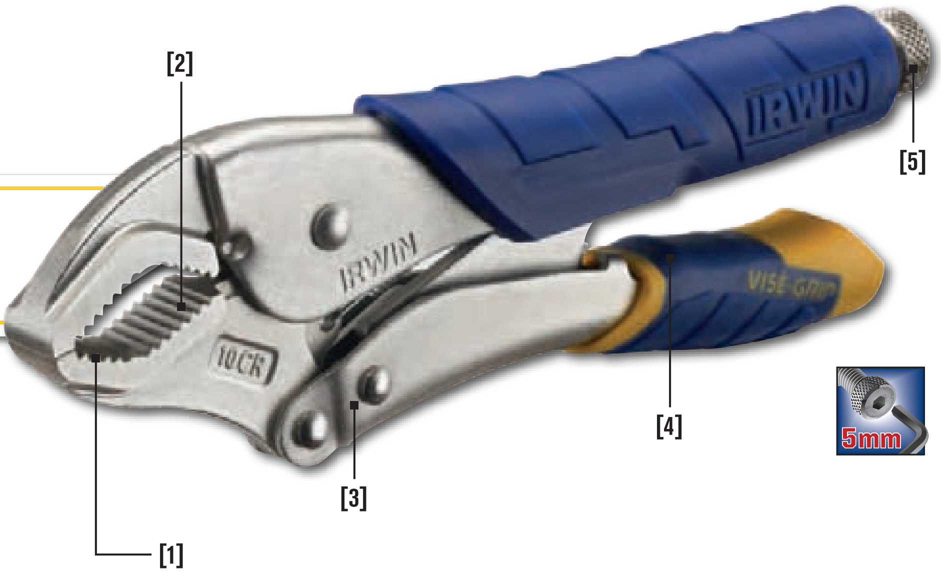
LOCKING PLIERS

The NEW IRWIN® Vise-Grip® Fast Release locking tools have a one handed, triggerless release, so they‘re twice as easy to open as the traditional design. Anti-pinch, non-slip ProTouch™ Grips provide comfort, control, and less hand fatigue.

IRWIN® VISE-GRIP® 10CR
FAST RELEASE



1. **UNIQUE CURVED JAW**
   Great for securely gripping and torquing multiple surface shapes, including round pipes, square or hex bolts, and more. Perfect for any application that requires maximum torque.
2. **SELF-ENERGISING LOWER JAW**
   Jaw mechanism provides 3X more gripping power*. Pivot allows jaw to align on workpiece for maximum grip without slipping or stripping.
3. **BUILT STRONG TO LAST LONG**
   2x Longer life* High grade alloy steel is heat treated for maximum toughness and durability.
4. **PROTOUCH™ GRIPS**
   Provides comfort, control and less hand fatigue.
5. **HEX KEY ADJUSTING SCREW**
   Tightens to draw material closer together for tighter grip. Loosens to provide controlled release.

ProTouch™ GRIPS

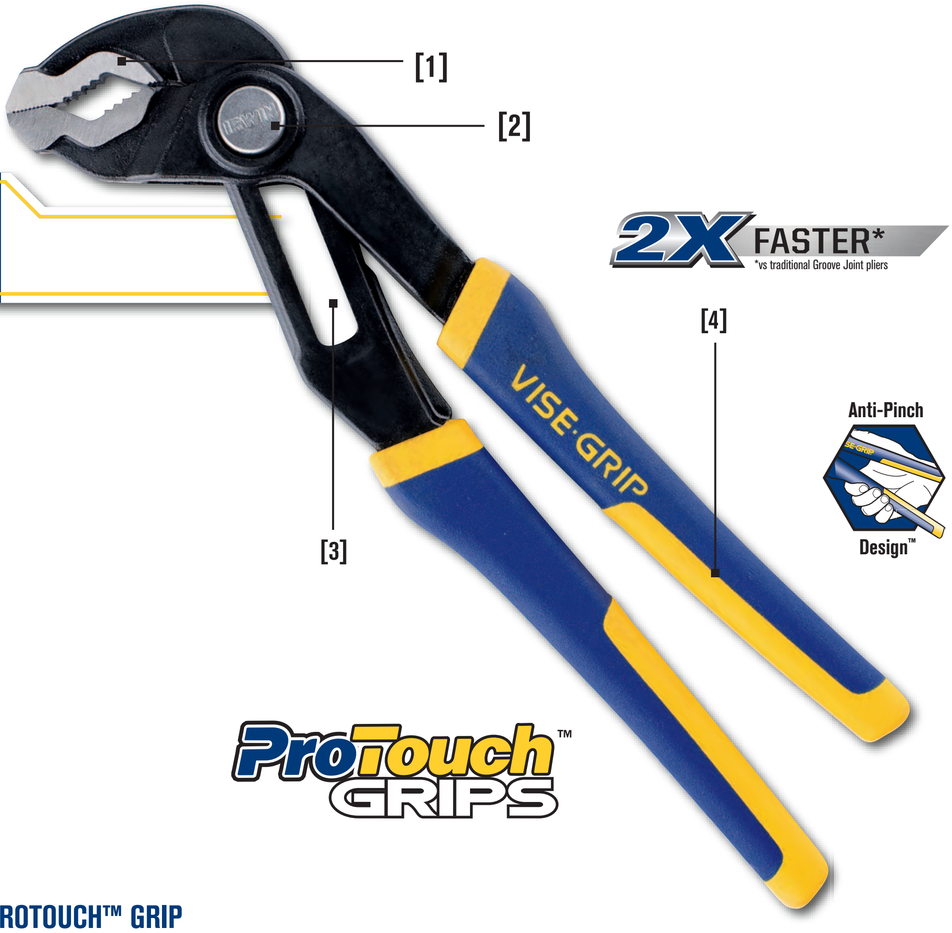
	**23**	8R 8"/ 200mm	8"/ 200mm	3-1/8" (78 mm)	**LOCKING SHEET METAL TOOL** The Locking Sheet Metal tool locks to work with powerful grip. Makes all kinds of bending, forming, crimping jobs easier and faster.	**Bending** **Crimping** **Forming**
	25ZR	9R 8"/ 225mm	9"/ 225mm	2-3/4" (70 mm)	**LOCKING WELDING CLAMP** The Locking Welding Clamp has deep-throated and U-shaped jaws for visibility and working space. Holds work in proper alignment. Use on sheet metal work on automobiles.	**Welding** **Holding**
	**27ZR**	20R 9"/ 225mm	9"/ 225mm	18" (455 mm)	**LOCKING CHAIN CLAMP** The Locking Chain Clamp holds and locks around any shape or any size of object and adjusts quickly for ratchet action in either direction. Extension chain is available.	**Holding**
	29	RR 7"/ 175mm	7"/ 175mm	1/4" (6 mm)	**LOCKING PINCH-OFF TOOL** The Locking Pinch-Off tool with round jaws pinches and locks on tubing instantly without damaging the tubing. Perfect to use for plumbing work, stops flow from untidy tubes. Very popular in the refrigeration market.	**Holding**
	**251**	9AC Locking Panel Clamp	9"/ 225mm	2-3/4" (70 mm)	**LOCKING PANEL CLAMP** The jaws for the Locking Panel Clamp are designed to move in a straight line motion which allows the handle to be out of the way. Auto-body panels can be clamped in place and the door shut to check for gaps before final welding.	**Clamping** **Welding**
	8 **4** **2**	4LW 4"/ 100mm 7LW 7"/ 175mm 10LW 10"/250mm	4"/ 100mm 7"/ 175mm 10"/250mm	(7 mm - 14 mm) (11 mm - 19 mm) (16 mm - 28 mm)	**LOCKING WRENCH** The jaws of the Locking Wrench lock on three sides of a bolt and will not slip or mark. The Locking Wrench is adjustable to over 16 wrench sizes and features a built-in wire cutter.	**Pulling** **Tightening**
	12L3	12LC 12"/ 300mm	12"/ 300mm	3-1/8"(79 mm)	**LARGE JAW LOCKING PLIER** The large jaws and clamping ability make this tool ideal for plumbers, mechanics, welders and others who work with large objects. Also, its convenient size makes it easier to use than bulkier tools, such as pipe wrenches.	**Holding** **Clamping**

GROOVELOCK WATER PUMP PLIERS WITH PROTOUCH™ GRIP

GrooveLock Pliers

GrooveLock Pliers are designed with twice the number of groove positions of traditional groove joint pliers to deliver optimal hand and jaw positioning - providing a superior grip. The specially engineered, all-purpose jaw grips round, hex, square and flat surfaces for incredible versatility.



IRWIN® VISE-GRIP® GV10
GROOVELOCK

2X FASTER*
*vs traditional Groove Joint pliers

Anti-Pinch Design™

1. **ALL-PURPOSE JAW:** Grips onto flat, round, hex & square work pieces to provide tremendous bite.
2. **PRESS-N-SLIDE BUTTON:** Adjusts jaws 2X faster than traditional groove joint pliers.
3. **MULTI-GROOVE RATCHETING SYSTEM:** Has twice the groove positions than other groove joint pliers, for precise positioning on any type of work surface.
4. **ANTI-PINCH NON-SLIP PROTOUCH™ GRIPS:** Provide comfort, control and less hand fatigue.

What is TÜV & GS?

- Guaranteed Safety to DIN Standards
- Proven Quality & Reliability

What is VDE?

- Safely working with electrical equipment up to AC 1000Volt or DC1500Volt

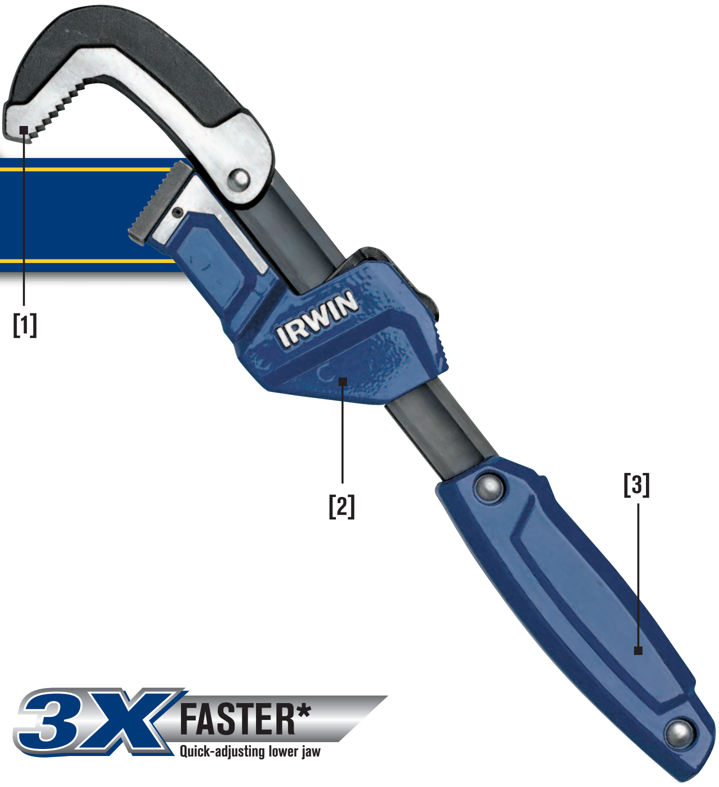
All Products on this page are TÜV/GS certified for optimal safety and user confidence.

IRWIN

PIPE WRENCHES

IRWIN® Record® offer a full range of plumbing tools designed to get the job done quickly and efficiently. From our solid-forged Stillson Wrenches to the lightweight Quick-Wrench, our range of pipe tools offer superior grip due to the unique 'V-shaped' tooth profile.

IRWIN® RECORD® QUICK-ADJUSTING PIPE WRENCH



1. **FORGED HOOK JAW**
   With 2-1/4" jaw capacity equivalent to standard 14" pipe wrench; ideal for pipe diameters up to 1-1/2"; ideal for most surfaces including black, galvanized, PVC and copper pipe, as well as nuts, bolts and couplings; broached teeth.
2. **QUICK ADJUSTING JAW**
   With one-handed operation, ratchets quickly to work the surface.
3. **CAST ALUMINIUM CONSTRUCTION**
   For 40% less weight than standard 14" cast iron pipe wrench; ergonomic handles are ideal for heavy torque and maximum comfort.

3X FASTER*

HANDIWRENCH

Chain pipe wrenches are mainly used in confined spaces, such as against a wall or close to a nest of other piping. Simply loop the chain around the pipe, lock it and the jaws will grip in the direction of the turn. The pipe can then be easily tightened or loosened with short strokes of the handle.

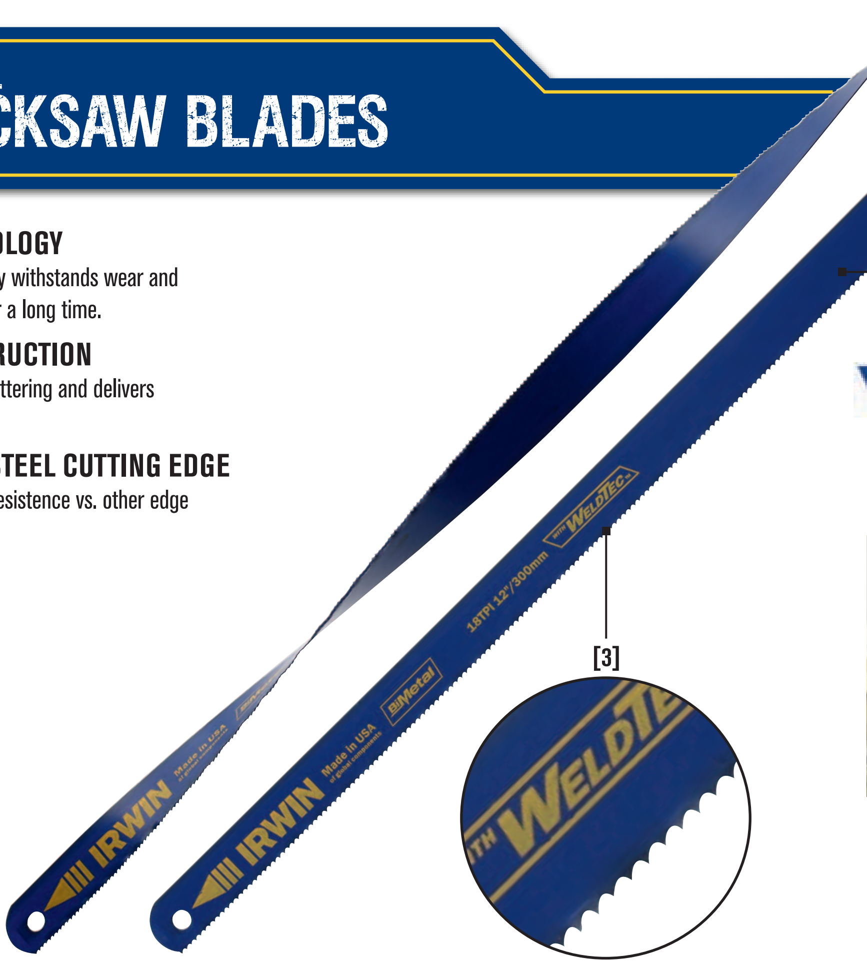
RECORD

HACKSAW BLADES

Improved cutting performance with the use of IRWIN® high-quality hacksaw blades. New tooth geometry provides higher resistance against tooth strippage and increases longevity & durability. Leveraging the advantages of the WeldTec™ platform IRWIN® hacksaw blades incorporate a new patented tooth design which enables faster, smoother and less tiring cutting.

BI-METAL
HACKSAW BLADES



1. **WELDTEC TECHNOLOGY**
   Innovative tooth geometry withstands wear and keeps the blade sharp for a long time.
2. **BI-METAL CONSTRUCTION**
   Prevents blades from shattering and delivers long blade life.
3. **M2 HIGH SPEED STEEL CUTTING EDGE**
   Delivers increased heat resistence vs. other edge materials.

HACKSAW FRAMES

The IRWIN® Hacksaw frames are built to meet the professional's demanding needs. The durable IRWIN® frames make cutting quick and easy.

I - 125 HIGH-TENSION HACKSAW (125KG/25000 PSI)

The IRWIN® heavy-duty hacksaw frame is able to reach over 125kg blade tension to ensure accurate cutting. The soft-touch handle gives professionals a solid and slip-free grip.

Ergonomic Metal Frame for higher blade tension preventing the blade being released when dropped
Metal Tensioning Mechanism for a longer lasting tool
Soft Touch Handles ensure a comfortable sawing grip and prevents slippage
Blade Storage no need to search for spare blades
90°-55° Blade Mounting for sawing large objects
Jab-Saw for sawing in confined spaces

BOLT CUTTERS

IRWIN® Record® bolt cutters made their debut in 1923. IRWIN® Record® bolt cutters combine specially formulated steel jaws and exacting manufacturing techniques to make a range of cutters that will handle high, low and medium tensile materials of all kinds.

HEAVY-DUTY ARM-ADJUSTED DROP FORGED HANDLES – CENTRE CUT

Designed to withstand the most extreme situations, high-tensile drop-forged steel jaws plus two-stage heat and ground jaws significantly increase durability and offer a stable cut capacity. Drop-forged steel handles provide safety and reliability and offer you optimal performance for cutting high-tensile material.

Each jaw is progressively heat treated to give a penetrating cutting edge and resilient body
Jaws are drop-forged from a specially formulated steel machined to precise specifications
Compound action supplies 80lbs of force for every 1lb applied to the handles
Drop-forged steel handles
Safety stops prevent trapped fingers

- 1 handle connecting pin
- 1 handle connecting clip
- 2 handle connecting bolts,
- 2 handle connecting nuts
- 2 arm rivets
- 1 jaw center pin

SNIPS AND SHEARS

IRWIN® Gilbow® snips and shears have a cutting capability much greater than the strength of the user. The original tin snips were first designed in 1924 and have dominated the sheet metal cutting industry to such an extent that today, snips and shears are referred to as 'Gilbows'.

Unique non-slip joint set and tested for a perfect cut. This should be re-adjusted only after sharpening
Double, hollow ground blades reduce friction for easier cutting
Drop-forged carbon tool steel handles and blades
Safety stop prevents trapped fingers

AVIATION AND OFFSET SNIPS

IRWIN® Aviation and Offset Snips have precision formed blades for a longer cutting life; ergonomically designed over-moulded soft-grips for a perfect balance of comfort and performance in the hand, and a long-life torsion spring for a smooth and consistent cut.

Serrated lower blade for firmer action, smoother cut, and no double marked edges
ProTouch™ moulded soft-grips for superior comfort and control, resulting in less hand fatigue/stress
Increased length of cut for faster work
Improved balanced weight distribution for greater comfort
Drop-resistant latch for easy one-handed use, saving time & increasing safety
250mm long with a 3.34cm length of cut
Cut capacity of 1.19mm sheet metal and 0.84mm stainless steel

IRWIN
IRWIN QUICK-GRIP

In 1933, a young man by the name of Hans Schroder set up as a wholesaler in Copenhagen, Denmark. During the first few years he kept his focus on selling general hand tools, but in 1938 he started to also manufacture saws. Amongst his friends and business associates Hans Schroder was known simply as Jack, and before long, the "Jack" name had become synonymous with the production of high quality saws.

IRWIN® Jack® has been at the forefront of many advances with the development of the market leading Jack® 880 Universal triple ground technology. The most recent innovation, EVO handsaw, with its unique handle-to-blade relationship continues to extend the capabilities of the tradesman.

At the heart of quality craftsmanship lies the rich heritage of Marples® woodworking tools. Originating in 1828 in Sheffield, England, the Marples® brand has consistently stood for superior performance and ultimate precision in fine woodworking.

Founder William Marples came from a long lineage of master craftsmen in the joinery and edge tool trades, and after serving as an apprentice to his father he established William Marples and Sons Limited. Using only the finest materials Marples® had his name stamped into every product as a sign of his confidence in the quality and craftsmanship of each tool.

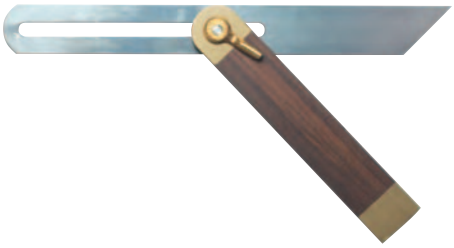
WOODWORKING TOOLS



HANDSAWS

The unique handle-to-blade relationship overcomes traditional design limitations and maximises how the user interacts with the handsaw. Holistic product concept which optimises the handle position (height and angle) to the tooth line with the optimal tooth design and superior ergonomics. One Saw covers virtually all user needs.

EVO
HANDSAW

1. **HIGH ANGLED NOSE**
   Increases blade stability.
2. **HARDENED TEETH**
   Hard Point teeth (HP) stay sharp 6-8 times longer than non-hardened teeth.
3. **OPTIMISED TOOTH DESIGN & SET**
   Provides maximum versatility, Speed of cut & quality of cut.
4. **HIGH QUALITY C75 STEEL BLADE**
   Ensures maximum stability and power transfer.
5. **UNIVERSAL USAGE**
   Optimised product design for universal usage and highest versatility.
6. **MAXIMUM BLADE USAGE**
   Allows up to 100% blade usage.
7. **FLUSH CUTTING**
   To cut off at surface level.
8. **COMFORT GRIP**
   Light and strong ultrasonic welded soft-grip handle for maximum grip and comfort.
9. **90°& 45°**
   For marking out.
10. **FINGER-REST**
   For maximum control.

XPERT HANDSAWS

The XPERT saw range takes wood cutting to whole new levels of comfort and performance.
Designed for Professionals - The XPERT saw range has a specific saw for every material and application.

IRWIN
XPERT

Triple-ground teeth for ultimate cutting performance
1mm rigid blade for maximum stability
Deep gullets for enhanced performance & greater volume removal of waste material (Coarse saw only)
Fine nose teeth for easy start (Universal and Toolbox Saw only)
Soft-grip handle with finger guide for maximum comfort in prolonged use
Hard point teeth for longer life
High quality C75 steel blade that is stable and ensures maximum power transfer
Water based lacquer gives four times better rust protection than traditional lacquer

The ultimate cutting comfort and performance of the XPERT comes from its breakthrough Triple-Ground Teeth (TGT). This technology has been developed in collaboration with the research centre of the University of Newcastle. The TGT logo is the mark of quality for the IRWIN® Jack® tooth design.

PLUS

Universal Triple-Ground Tooth This unique triple-ground tooth design makes the IRWIN® Jack® 880 Triple Ground Saw 25% faster than the double ground version
Additional ground edge improves cutting performance on both forward & backward strokes
Increased gullet size facilitates more efficient saw dust removal
Optimised set pattern to help smoothness of cut & more efficient saw dust removal

HANDSAWS

The IRWIN® Plus range gives you an extremely comprehensive choice of handsaws, with models and tooth configurations suitable for all wood cutting applications.

BEVELS AND SQUARES

Bevelled squares are used for marking out lines, testing squares and angle lengths. Sliding bevels are used for marking angle lengths. All measuring tools are made from aluminium block and with a steel blade. The scales are etched on the surface which ensures long durability and are manufactured according to very fine tolerances, so all IRWIN® measuring tools are very precise.

PLANES & PLANE CUTTERS

BENCH PLANES

IRWIN® Record® bring decades of experience, well proven design and advanced production techniques to produce this fine range of woodworking planes.

High-quality cast grey iron body with precision machined base
Carbon steel cutting iron
Robust lever cap has three pressure points & brass locking nut for secure location of the cutting iron
Fine adjustment is controlled by a brass adjusting nut and lateral adjusting lever
Impact-resistant ABS resin handle and knob for comfort and control

QUICK-GRIP
IRWIN
QUICK-GRIP

QUICK·GRIP®

In 1986 Joe Sorensen, an air boat builder in Nebraska USA, was looking for a better way to hold down his steel panels as the clamps he was using twisted the thin steel as he worked.

A year later, with a good idea for a new style of clamping, he came to American Tools and soon became an employee and working together, the concept for a pistol grip one-handed bar clamp was born. This revolutionary tool was quickly patented and brought to market in 1989 with a full line of clamps under the Quick-Grip® brand name. The line was later extended from the Original clamp to the Micro, Mini, Handi, Quick-Change, and more recently the XP clamp.

Since the launch, IRWIN® Quick-Grip® has become the world leader in one-handed bar clamps and is the industry standard which has changed the way tradesman do their jobs, greatly improving their ability and efficiency on the job.

Record®

Originally established in 1898 in the South Yorkshire city of Sheffield in the UK. The Record Tools Factory was swiftly able to make a long lasting contribution to the worldwide reputation of the region for the manufacture of high quality steel and castings.

The Record® brand name was introduced in 1909 and by the 1920's the product range had expanded into Vices, Planes, Clamps and Pipe Wrenches enabling the business to grow rapidly in the UK and many overseas markets.

Today, IRWIN® Record® continues excelling by sticking to the traditional values set by its founders, producing tools that are highly valued amongst professional users for quality and durability that remains strong today.

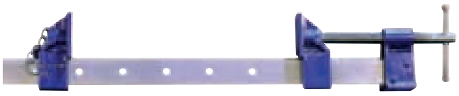
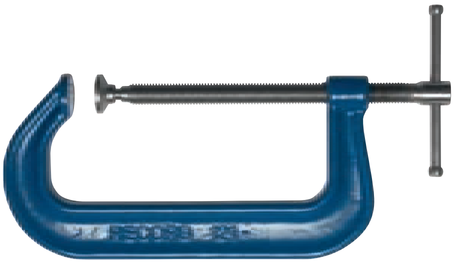
STEEL CLAMPS



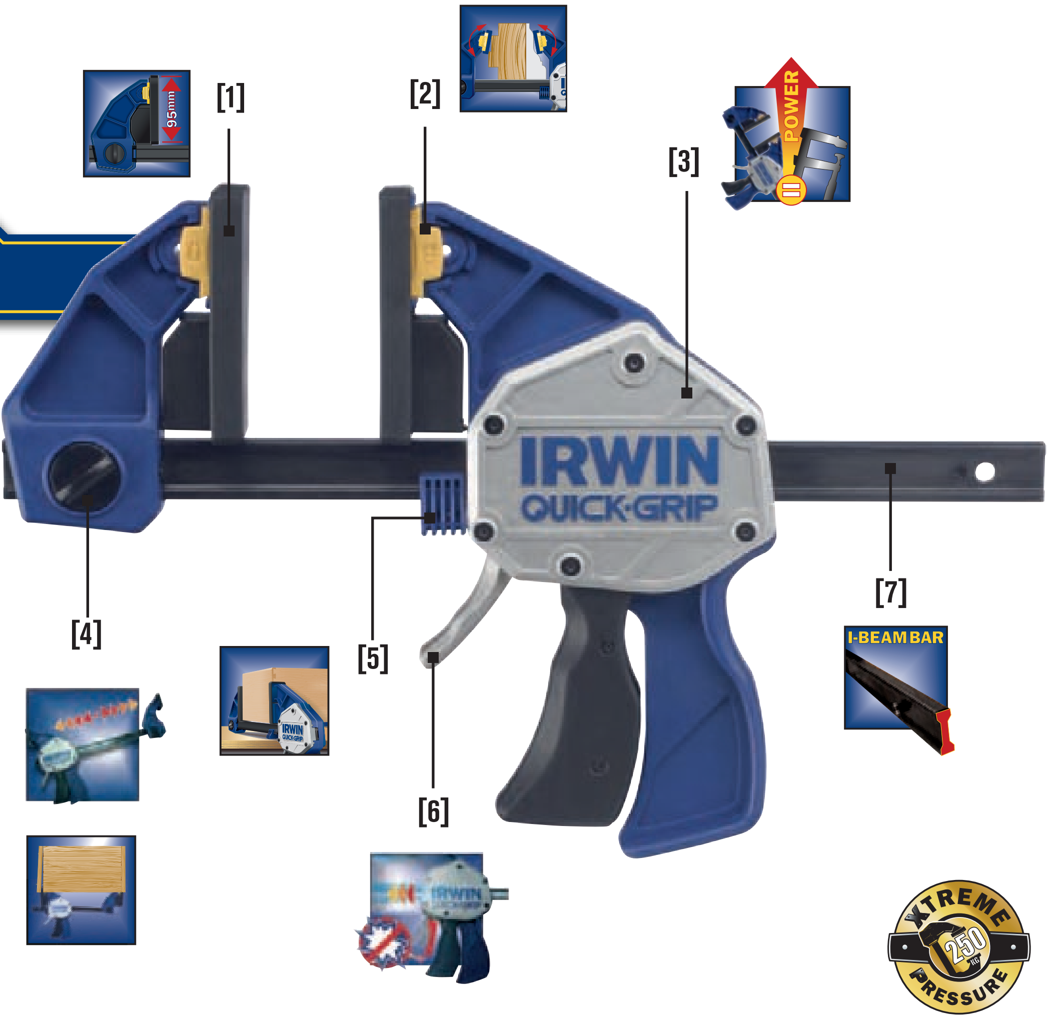


XP

XP ONE-HANDED BAR CLAMP/SPREADER

MAXIMUM GRIPPING STRENGTH WITH ONE HAND

The clamp offers “Xtreme Pressure” which is up to two times greater than all of its competitors. Full face pads and a supporting foot have been added, plus lockable swivel jaws to ensure that both jaws are always parallel and pressure is evenly distributed when gluing.



XP BAR CLAMP

1. **FULL FACE PADS**
   (Replaceable)
2. **LOCKABLE SWIVEL JAWS**
3. **UP TO TWO TIMES MORE CLAMPING FORCE**
   Than other one-handed bar clamps
4. **QUICK-CHANGE SCREW**
   No tool required, easily converts clamp to a spreader
5. **SUPPORTING FOOT**
   (18", 24", 36" & 50")
6. **LOW-EXPLOSIVE RELEASE MECHANISM**
7. **FREE SLIDING I-BEAM BAR**

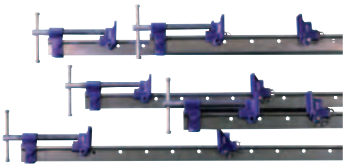
T-BAR CLAMPS 136 SERIES AND SPARE PART

These clamps resist twisting and distortion under clamping pressures. Both the head and slide are guaranteed unbreakable. The slide is secured by a solid steel pin passing through one of the locating holes spaced along the steel bar. The steel mainscrew applies pressure quickly and smoothly through a fast acting, hard wearing rolled thread. Slides and heads are flat bottomed so that the clamp will stand without support.



Item No.	Description	Clamping Capacity	EAN	Master Pack	Shelf Pack

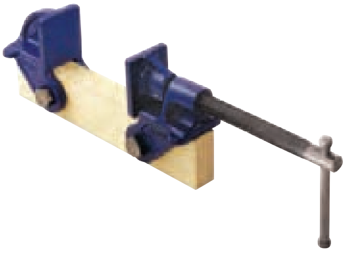
CLAMP HEADS

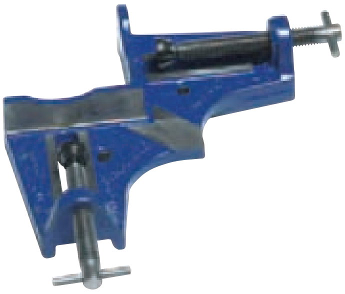
Low cost alternative to full size bar clamps. The grey cast iron head and slide with steel mainscrew can be fitted to a wooden batten 1”/25mm thick by 1-1/2”/38mm wide and any length.



Item No.	Description	EAN	Master Pack	Shelf Pack
TM130	Clamp Head, 25 x 38mm	0734442348078	-	6

MITRE CUTTING CORNER CLAMPS

Accurate mitre clamping is provided by IRWIN® Record® Corner Clamps. The clamps have two countersunk holes for fixing to a wooden block, which can then be secured between the jaws of a bench vice.
Thanks to the precision machined clamping surfaces and open design, these clamps are straight forward to operate and provide easy access for glueing and nailing.



Item No.	Description	Clamping Capacity	EAN	Master Pack	Shelf Pack
TM140	Mire Cutting Corner Clamp 50mm	50mm / 2”	0734442028444	24	1

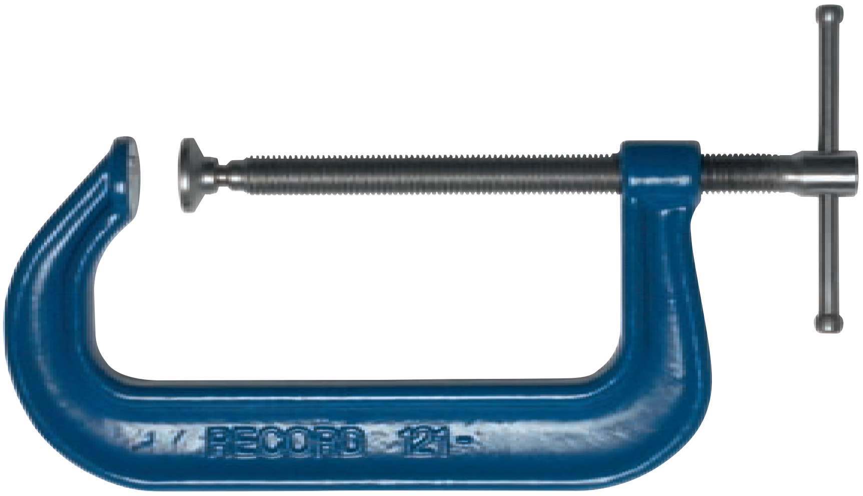
HEAVY-DUTY G-CLAMPS 121 SERIES

IRWIN®'S STRONGEST G-CLAMP

IRWIN® Record® Heavy-Duty G-Clamps are the strongest you can buy. Recommended particularly for metalworking and fabrication work where a very high clamping force is demanded.



Drop-forged steel frame for strength and durability. Recommended for heavy-duty metal and fabrication work
Swivel shoe helps clamping on uneven surfaces
Twin-start Acme cold rolled thread for faster operation
Fused steel handle will bend before the clamp can be overstressed

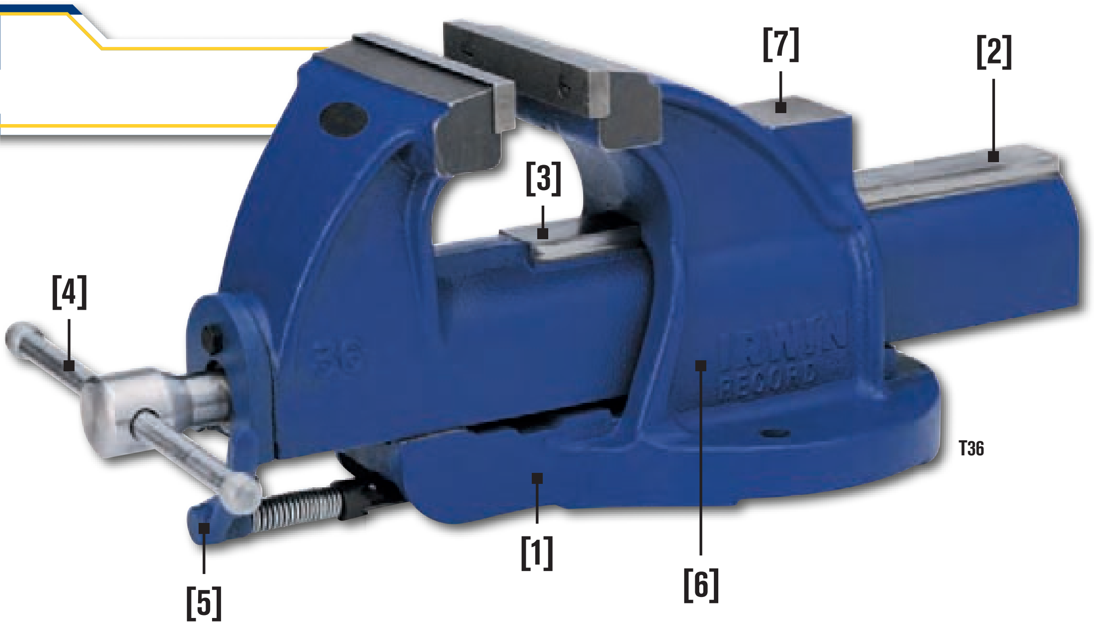
VICES AND ACCESSORIES

IRWIN® Record® Vices have become the benchmark by which all other vices are measured. Design, choice of materials and manufacturing disciplines each set very high standards which, for the end user, translate into safety, reliability and excellent value.

ENGINEERS' VICE - LIFETIME VICE RANGE

Designed for heavy-duty work, these vices are made from S.G. Ductile Iron with an integral anvil for shaping and beating, together with a quick-release mechanism for rapid slide adjustment. The reinforced body and slide, large diameter main screw allow these vices with the working strength and resilience to withstand the most demanding work. Fitters' vices are similar in design to Engineers' however made of close grained gray iron instead of S.G. Ductile Iron. Full line of replacement parts available.

ENGINEERS' AND
FITTERS' VI



1. **IRWIN® ENGINEERS' VICES**
   Are made from S.G. Ductile Iron with high-impact resistance, guaranteeing strength and long life.
2. **SAFETY STOP**
   Prevents the slide from being separated from the body.
3. **FULLY MACHINED**
   On all load-bearing surfaces for smooth and troublefree operation.
4. **FUSED STEEL HANDLE**
   Will bend before the vice can be overstressed.
5. **QUICK-RELEASE MECHANISM**
   Disengages the main screw, allowing rapid movement of the slide.
6. **UNBREAKABLE SG IRON NUT**
   Can be replaced when worn.
7. **INTEGRAL ANVIL**

** S.G. Ductile Iron is strong and flexible with similar characteristics to steel and is virtually unbreakable. Heavy duty vices manufactured from this material are designed to take much more punishing workloads than normal vices.

MECHANICS' VICE - HEAVY DUTY RANGE

Rigid and robust, the body and sliding jaw are cast from close grained grey iron which is machined on all friction surfaces for a smooth reliable action. The jaws, handle and main screw are steel, the latter having a two-start rolled acme thread to speed the jaws from fully closed to fully open with a minimum of winding. The most commonly used vice in the IRWIN® range. Full line of replacement parts available.

Body and sliding jaw are cast from close grained grey into iron which is machined on all friction surfaces for a smooth reliable action
Safety stop prevents the slide from being separated from the body
Replaceable hardened steel jaws
Unbreakable SG iron nut can be replaced when worn
Fused steel handle will bend before the vice can be overstressed

WORKSHOP VICES - MEDIUM DUTY

Strong and durable, the body and sliding jaw are cast from close-grained grey iron which is machined on all friction surfaces for a smooth reliable action. The jaws, handle and main screw are steel, the latter having a two-start rolled acme thread to speed the jaws from fully closed to fully open with a minimum of winding. This compact Bench with anvil is specifically designed for medium-duty workshop applications for both, the professional craftsman and the DIY enthusiast who expect a compact vice with superior clamping force, safety features and excellent finish.

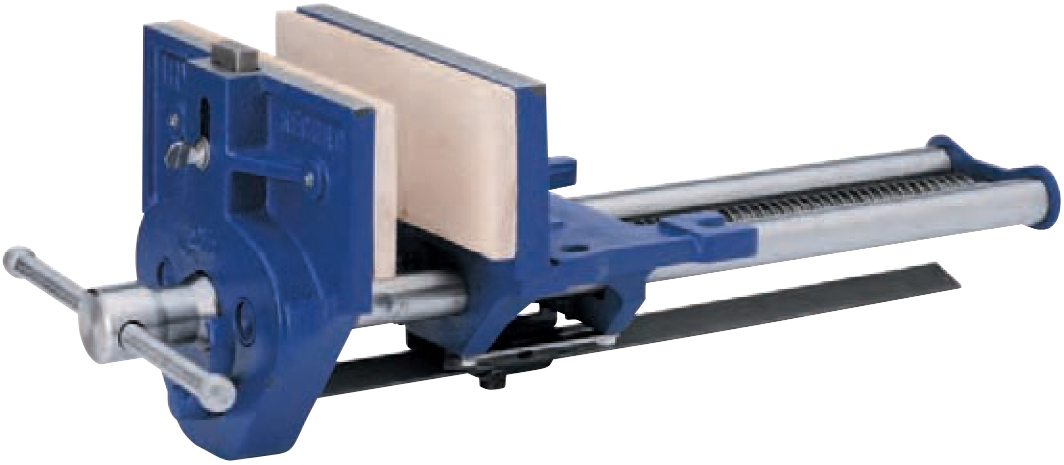
QUICK-RELEASE WOODWORKING VICE

Squeeze the trigger and a quick-release vice can be opened and closed without using the mainscrew. Large and small work pieces can be quickly interchanged, while releasing the trigger returns the mechanism to normal for fine adjustment. An ideal addition to the engineering workshop or tool room. For clamping and holding wood work pieces.



Two steel guide rods to reduce wear and ensure a smooth parallel action
Jaws "toe in" so that when pressure is applied they give an even clamping over the whole depth of the work piece
Adjustable dog used in conjunction with bench stops fitted into the bench top
Location holes are provided so you can fit your own choice of wooden cheeks to protect the work piece
Squeeze the trigger and a quick release vice can be opened and closed without using the mainscrew. Large and small work pieces can be quickly interchanged

CHAIN PIPE VICES

The chain pipe vice generates a powerful grip due to it's sturdy construction. The drop forged, heat-treated steel jaws and high-tensile steel chain are mounted on a body cast from ductile iron that is guaranteed unbreakable. The flexible chain means the vice is compact and easy to store when not in use.

Knives and Blades

IRWIN
IRWIN
IRWIN

LONG-LASTING BiMetal TECHNOLOGY

BI-METAL UTILITY BLADES

Bi-Metal is formed by welding high-speed steel edge and spring steel, having the benefit of both types: Safety & Longer Life.

The blades are safer since they will not break under normal working conditions, they help reduce the risk of injury from breaking or shattering blades. And with Bi-Metal blades lasting longer than traditional carbon blades, they result in fewer blade changes which means fewer accidental cuts.

BI-METAL BLUE BLADES

1. **SHATTERPROOF**
   The spring steel backing combined with dual hardening of the blade makes our blade more durable, and shatterproof.
2. **LAST 3 TIMES LONGER***
   More cuts for your money.
3. **SPRING STEEL**
   Allows the blade to bend without accidentally breaking.
4. **HIGH-SPEED STEEL**
   Delivers a hardened cutting edge that stay sharp 3x longer than traditional carbon blades*.
5. **FITS MOST KNIVES**
   The two-notch blade design fits most utility knives.
6. **SOFT SNAP TECHNOLOGY**
   For breaking a new edge confidently.

UTILITY BLADES

CARBON STEEL 4POINT TRAPEZOID BLADES

This latest IRWIN® innovation combines the toughness of a traditional trapezoid blade with the increased blade tip life of a snap-off blade. Scored edges give the user 4 sharp points (vs. 2 points on a standard trapezoid blade) which doubles the life of the blade. The 4 notches enable the blade to be extended to maintain blade length after snapping off sections of the blade.

2X LONGER LIFE*
*vs. traditional carbon blades

Formers supported on both sides so they will not twist under heavy loading
Durable, hardwearing steel rollers last much longer than aluminium
Solid lug allows the machine to be held firmly between vice jaws
Heavy gauge formers won't lose their shape
15 & 22mm Formers have degree marks on the casting for 'at-a glance' accuracy
Flat edges to the bracket arm also allow the GLM to be used in workshop vice for convenient bending
Steel inserts to the bungs eliminate piercing and increase durability
To assist the bending of large diameter tube the IRWIN® Hilmor® GLM has pimpled bungs on the bending levers which prevent the arms slipping if they are used on the floor

PIPE AND TUBE BENDERS

With the IRWIN® Hilmor® range of tube benders, you can be ready to tackle any job with ease. All machines feature precision tooling to give a smooth, accurate bend every time across a large range of sizes.

GLM HAND BENDING MACHINE AND SPARE PART

The IRWIN® Hilmor® GLM hand bender has a maximum capacity of 22mm copper and 15mm stainless steel and can also bend 12, 15 & 18mm copper. The GLM is also available with imperial tooling. The design of the IRWIN® Hilmor® GLM with a straight arm makes it the strongest machine available.

joran®

The origins of Joran® go back to May 1944 at which time, good friends Poul Jensen and Herman Reinholdt formed the company Jensen and Reinholdt in Hvidovre, Denmark. They initially began producing masonry drill bits and later in 1955 expanded the production line to hammer drill bits.

Both product lines were characterised by uncompromising quality and were mainly offered to the building and construction industry. IRWIN® is committed to continue the original values of these products by delivering state of the art of Power Tool Accessories. The masonry drill bits range is no exception to this, and continues to fulfill the highest industry standards.

The Joran SPEEDHAMMER™ Plus and SPEEDHAMMER™ Power have the certification of “Prüfgemeinschaft Mauerbohrer” e.V. (PGM), which is the official and independent marking validating the standards of masonry drill bits. The mark is granted only to manufacturers fulfilling the following:

- state-of-the-art manufacturing under use of a quality assurance system
- yearly inspections of the produced drill bits by independent institutes

The inspection requirements are developed by the national approval bodies for anchors in co-operation with leading manufacturers of masonry drill bits and anchors. The Steering Committee of PGM® also carries out appropriate investigations in order to assure the suitability of masonry drill bits for anchor fixings.

New types of drills bits get the inspection mark only after extensive testing has been carried out, ensuring the required suitability and performance.

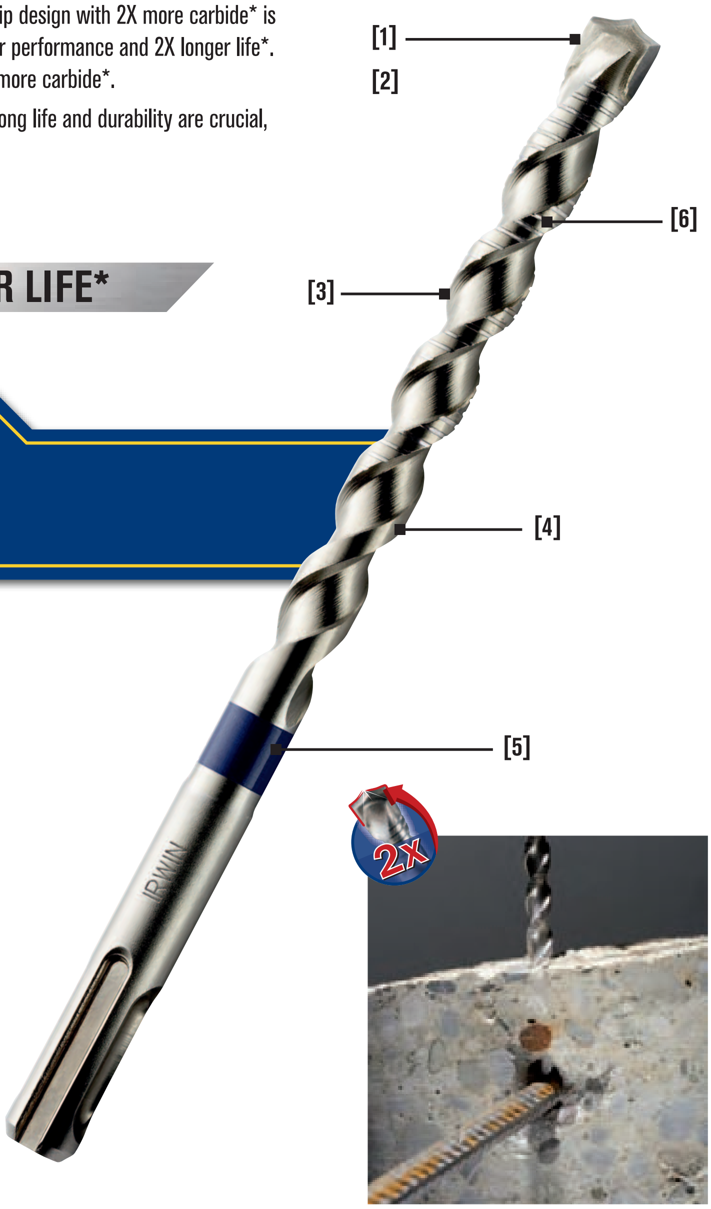
SPEEDHAMMER™ POWER

LONGEST LASTING IRWIN® HAMMER DRILL BIT EVER!

The new range of Speedhammer™ POWER drill bits is the most powerful yet. The unique tip design with 2X more carbide* is optimised for fast, continuous drilling, even through reinforced concrete, delivering superior performance and 2X longer life*. The Speedhammer™ POWER bit has a high-performance tip that's manufactured with 2X more carbide*.

It easily powers through 2X more concrete and rebar than traditional masonry bits. When long life and durability are crucial, depend on the IRWIN® Speedhammer™ POWER Bit.

2X LONGER LIFE*



SPEEDHAMMER™ POWER

1. **2X MORE CARBIDE IN TIP**
   For longer drilling life even in rebar-reinforced concrete.
2. **FAST 2-CUTTING CARBIDE TIP**
   Optimised for cutting through rebar at high speed.
3. **MAXIMISED FLUTE**
   For faster, more efficient dust and debris removal.
4. **PREMIUM STEEL**
   Provides improved core strength for maximum durability and extended life.
5. **BLUE POWER RING**
   For easier identification in the toolbox.
6. **OPTIMAL GROOVE DESIGN**
   Minimises friction for increased speed and longer life.

APPLICATION:
Compatible with all hammer drilling machines with SDS-plus holder.
Optimised for fast, continuous drilling, even through reinforced concrete, delivering superior performance and 2X longer life*.

DRILLING RECOMMENDATION:
When using drill bits with length over 400mm, pre-drill at least 150mm deep with a shorter drill bit of the same diameter.

SPEEDHAMMER™ Power drill bits have the certification of Prüfgemeinschaft Mauerbohrer e.V. (PGM).

BENEFITS OF PGM MARKED DRILL BITS:
- Strict tolerance limits for the diameter and the symmetry of the carbide tip ensuring the exactness of the drill hole.
- Secure anchoring and fixing.
- Constant quality assurance.
- Safety and confidence in the product.

Adherence to these criteria is constantly controlled by PGM, making the tool safe and trustworthy for the end user as well as the distributor.

* vs traditional masonry bits

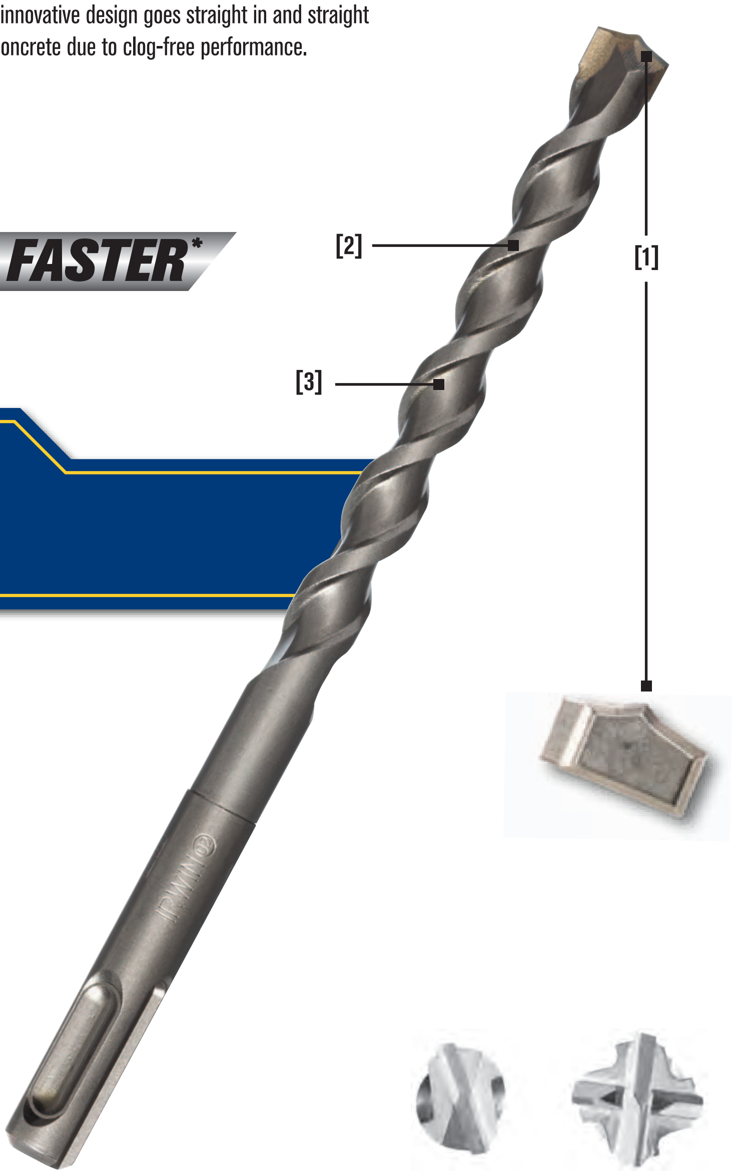
SPEEDHAMMER™ PLUS

FASTEST IRWIN® HAMMER DRILL BIT EVER

Speed. Set the pace with Speedhammer™ Plus. With 28% greater flute capacity, the innovative design goes straight in and straight out. It removes dust and debris really fast. And it's particularly effective in uncured concrete due to clog-free performance.

20% FASTER*



SPEEDHAMMER™ PLUS

1. **INNOVATIVE HEAD AND TIP GEOMETRY**
   25% thicker carbide tip improves strength and durability.
   Aggressive concave cutting angles increase drilling speed by up to 20%.
   Extra short drill bit head clears drilling dust directly into the flute, reducing the risk of clogging.
   Centering point prevents walking.
2. **UNIQUE FLUTE DESIGN**
   New extra deep, asymmetrical flute design secures a faster dust removal and increases drilling speed.
3. **SURFACE TREATMENT**
   Drill bit fully hardened resulting in maximum rupture strength.

2-Cutter Head

4-Cutter Head

SPEEDHAMMER™ Plus drill bits have the certification of Prüfgemeinschaft Mauerbohrer e.V. (PGM).

BENEFITS OF PGM MARKED DRILL BITS:

- Strict tolerance limits for the diameter and the symmetry of the carbide tip ensuring the exactness of the drill hole.
- Secure anchoring and fixing.
- Constant quality assurance.
- Safety and confidence in the product.

Adherence to these criteria is constantly controlled by PGM, making the tool safe and trustworthy for the end user as well as the distributor.

APPLICATION:
Compatible with all hammer drilling machines with SDS-plus holder.
Designed for drilling in concrete, masonry, brick, block, and granite.

DRILLING RECOMMENDATION:
When using drill bits with length over 400mm, pre-drill at least 150mm deep with a shorter drill bit of the same diameter.

* Up to 20% faster drilling vs. competitor products due to tip geometry and innovative flute design.

IRWIN® tip design enhances dust removal and provides symmetrical holes

Head takes 80% of the workload, ensuring higher durability, speed and rebar performance

53° drilling head design means more aggressive cutting and faster dust removal for overall faster performance

Four-cutter tips for less vibration, faster drilling, rounder holes and better anchoring

Single Flute design for faster dust removal and increased drilling speed

Shank fits in all SDS Max Hammer Machines

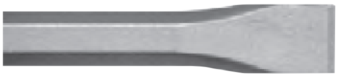
For a wide range of applications for both SDS Plus and SDS Max hammer drills: breaking through, breaking up concrete, light demolition work and chasing of channels for pipes and electrical conduit
Application: concrete and masonry
Grey sandblasted professional finish

DEMOLITION CHISELS

POINTED CHISEL

For general chiselling and breaking work in brick, concrete and loose stone (eg: when laying cables)

FLAT CHISEL

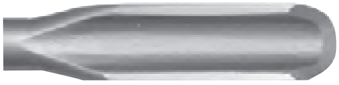


For general chiselling and breaking work in brick, concrete and loose stone (eg: when laying cables)

SPADE CHISEL

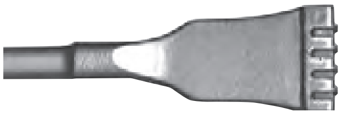
For removing large quantities of material

GOUGE CHISEL



For cutting narrow channels into concrete

TCT POINTING CHISEL



For the removal of pointing in brickwork

CRANKED TILE CHISEL

For easy removal of tiles

HEAVY DUTY CORE DRILLS

Designed for drilling large diameter holes in concrete and rock.

Designed for drilling of large diameters (35-150mm) into: Concrete, Granite and other very hard materials

10507223	Pilot Drill Bit 8 x 120mm	-	120	1	5706915072235	200	1

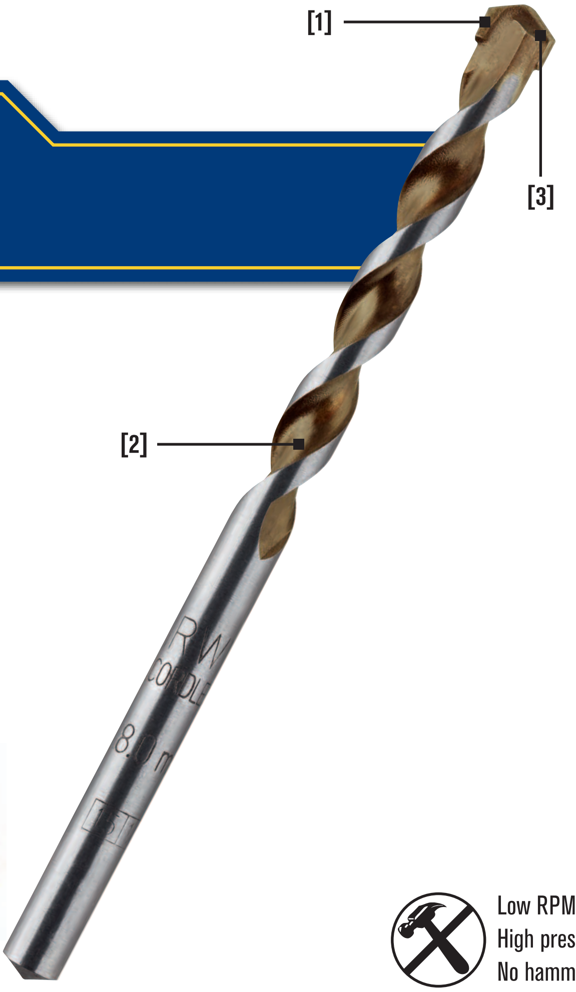
Pilot drill: The pilot drill is securely fixed by a set screw which can be tightened with a hex key
Core removal: After drilling, the core often gets stuck in the core drill. To make the removal easier, the lightweight core drills have a hole

ONE DRILL BIT FOR EVERY NEED!

The Cordless Multi drill bit is IRWIN®'s most versatile drill bit. It is designed to drill in multiple materials including brick, light concrete, dry wall, ceramic tiles, sheet metal, wood, plastic and marble. In addition to the multipurpose function, the Cordless Multi is IRWIN®'s problem solver for drilling into ceramic tiles up to a hardness grade of 9.

CORDLESS MULTI

1. **HARDEST CARBIDE GRADE**
   And unique point grinding for fast drilling into most common materials and hardest tiles (scratch hardness 9).
2. **SINGLE FLUTE DESIGN**
   Giving maximum space for dust removal. Up to 15% Speed advantage over competition. 10% more holes per battery charge.
3. **UNIQUE TIP GRINDING**
   Brazed carbide tip has a unique diamond ground 4-face design for excellent centering and perfect hole quality.



Low RPM.
High pressure.
No hammer action.

Improved carbide tip design ensures for durable and fast drilling in all masonry materials

Aggressive head design up to 15% Speed advantage over competition

Now 20% more life vs. previous version

Single flute design giving maximum space for dust removal and provides a 60% faster dust removal

GRANITE

DESIGNED FOR PERCUSSION DRILLING IN VERY HARD MATERIALS

For percussion drilling in very hard materials such as granite

Extremely hard and wear resistant carbide tip guarantees up to 40% more holes compared to conventional masonry drill bits

Stone masons favour this product for impact drilling of natural stone like granite

Special shaped cutting edges mean higher durability resulting in 50% more accurately sized holes per drill bit.

SEE PAGE 128

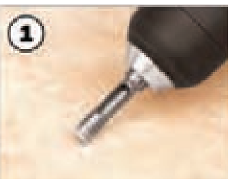
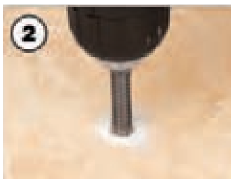
H₂O

USEFUL TIPS:

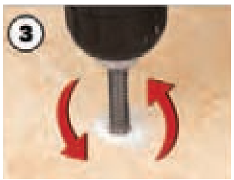
1. Drilling with water increases the lifespan of the tool.
2. Do not press strongly on the tool, let it work.
3. Make a swinging movement to allow dust evacuation.
4. Cutting speed: 2700 RPM.
5. No hammer action.



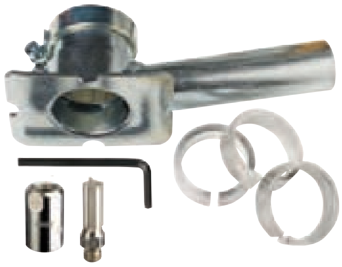
The drill needs to run before hitting the surface. To avoid sliding of the drill, start with an angle of 45°



Once the hole has started, raise the drill gradually up to the vertical line



Make an oscillating movement while drilling



MORTAR RAKES

The Mortar Rake is designed to replace traditional methods of mortar removal such as powered mortar chisels and cutting discs. The rake is faster and less intrusive to surrounding brickwork and, unlike other methods, it is just as efficient for both horizontal and vertical joint clearing.

Please note that the cutters must be used together with an adaptor (10507234) and angle grinder.

Item No.	Description	EAN	Master Pack	Shelf Pack

M-SYSTEM

2 in 1 tool designed for easy and fast fixing of roofing materials

The M-System is a two-in-one tool for drilling and fixing of fibre cement and similar roofing/panelling materials

Improved carbide tip ensures easy start

After drilling the hole pull back the pilot drill and fix a hexagon screw with the same tool

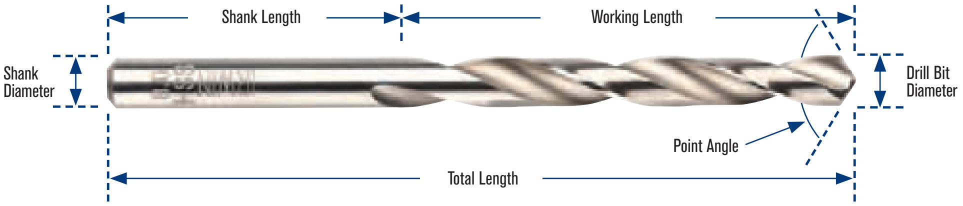
Metal Drilling

IRWIN
12
RECORD
SQ6

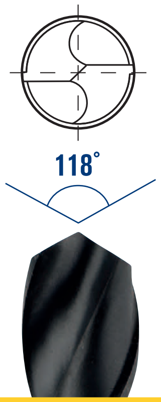
ENGINEERED FOR CONTROLLED PRECISION AND SPEED

The IRWIN® line of metal drill bits offers of solution for every professional application. Each metal drill bit is made of high speed steel with high precision-cut point and spiral, ensuring durability and quality.

Total Length: The length from the point to the end of the drill bit
Point Angle: The angle of the cutting edges
Drill Diameter: The cutting diameter of the drill bit
Shank Length: The end of the drill bit that is secured by the drill
Working Length: The length from the point to the end of the flutes

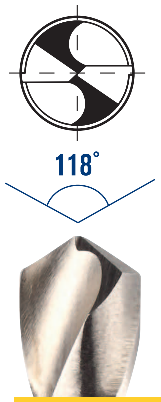


TIP GEOMETRY



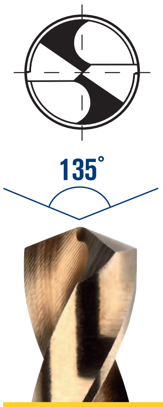
118° STANDARD POINT

- For drilling in alloyed and non-alloyed steels, non-ferrous metals, cast iron and hard plastics
- Can be easily resharpened
- Requires higher feed pressure
- Best for stationary drills



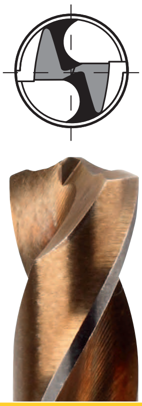
118° SPLIT POINT

- For drilling in alloyed and non-alloyed steels, non-ferrous metals, cast iron and hard plastics
- Very good centering
- Requires less effort / feed pressure



135° SPLIT POINT

- For drilling in high strength steel and high-alloy steels
- Very good centering
- Requires less effort / feed pressure



TURBOMAX® JET POINT

- Specially designed for portable drills
- Excellent centering, will not walk on any surface
- Precision-ground to stay sharp longer and drill faster

STEP DRILLS

HSS COBALT

HSS PRO

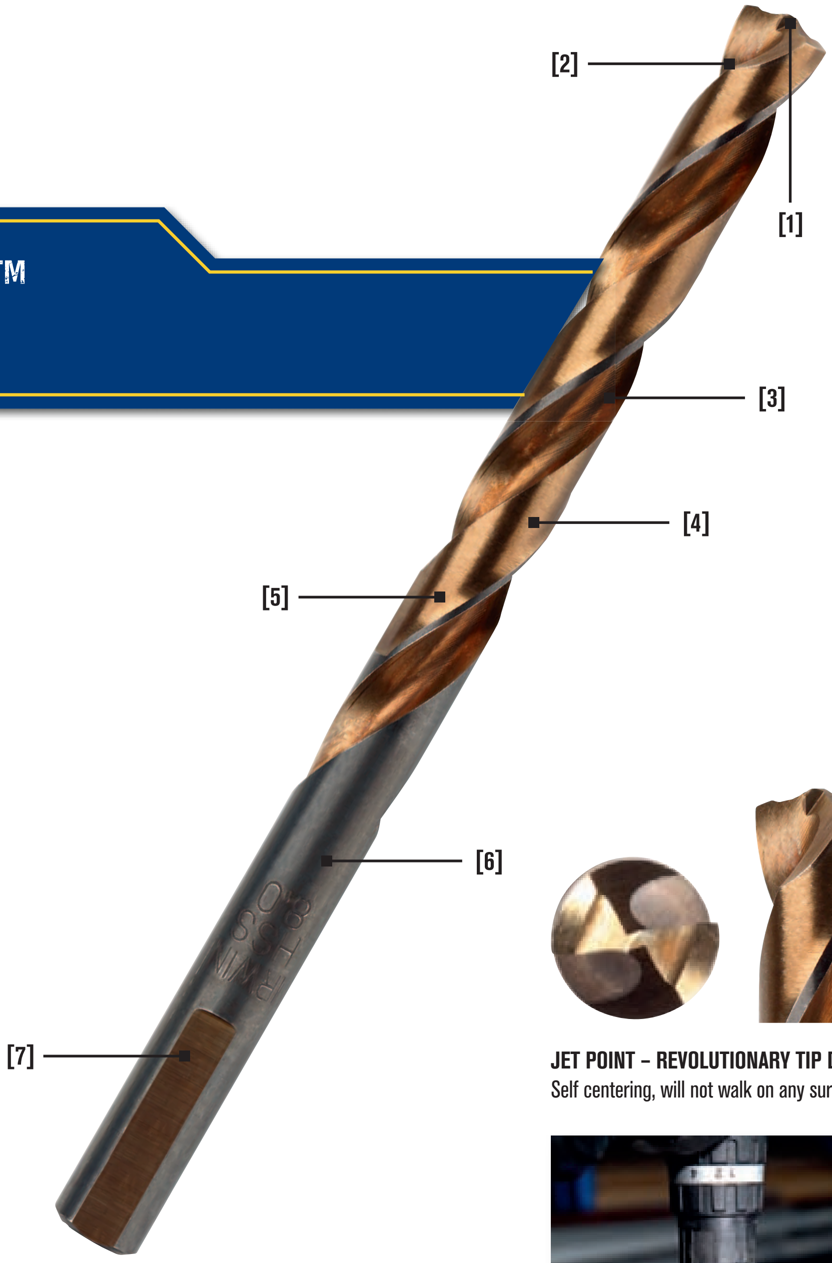
TCT

TURBOMAX™ HSS

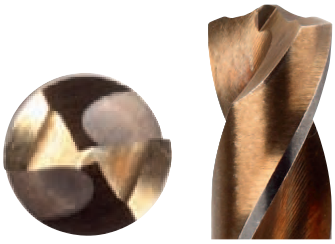
DESIGNED FOR HIGH PERFORMANCE DRILLING

Turbomax™ is designed primarily for high performance drilling in sheet metal, however, also performs well in all types of wood and plastic. Suitable for drilling stainless steel however, HSS Cobalt products (p.105) are designed specifically for this purpose. Remember to always use a coolant when drilling stainless steel.

TURBOMAX™



1. **100° TIP FOR FASTEST START**
   Most precise centering and guidance.
   No walking, also on curved surfaces.
   No centre punch necessary.
2. **140° CUTTING SHOULDER FOR SMOOTH FINISH**
   Perfectly round holes.
   Clean exit holes – minimised burrs.
   Will not bind in multiple layers of thin material.
3. **GROUND FLUTE**
   Ground from solid.
4. **REINFORCED WEB**
   For added strength and durability
   Robust design –no breakage.
5. **W9 HSS (HIGH SPEED STEEL)**
   Superb heat resistance.
   Sharp cutting lips.
6. **HARDENING**
   Superb wear resistance.
   Hardness of 63-66 HRC.
7. **3-FLATTED SHANK**
   Prevents slipping in chuck.
   No damaging of the drill due to slipping.
   Safe and strong clamping, especially when using keyless chucks.
   Best power supply to the cutting lips – spend the power where it's needed.



JET POINT – REVOLUTIONARY TIP DESIGN
Self centering, will not walk on any surfaces

135° SPLIT POINT GRINDING ensures perfect centering and reduced drilling pressure
GROUND FLUTE Industrial quality ground flute for high accuracy drilling and fast removal of chips
TITANIUM NITRIDE COATED Drill bit body manufactured from high quality HSS steel coated with Titanium Nitride (TiN).
The TiN coating has a hardness of app. 80 HRC and is very resistant to wear.
TiN has a low coefficient of friction. This results in less power being consumed and less heat generated during the drilling.
SPEED AND FEED Compared to traditional HSS Twist Drill Bits speed can be increased by 40 -60% and feed by 10 -20% without reducing the life time of the drill bit significantly
LESS HEAT TiN is also a poor conductor of heat, so the heat generated during the drilling process is diverted into the chips and coolant and less into the drill bit

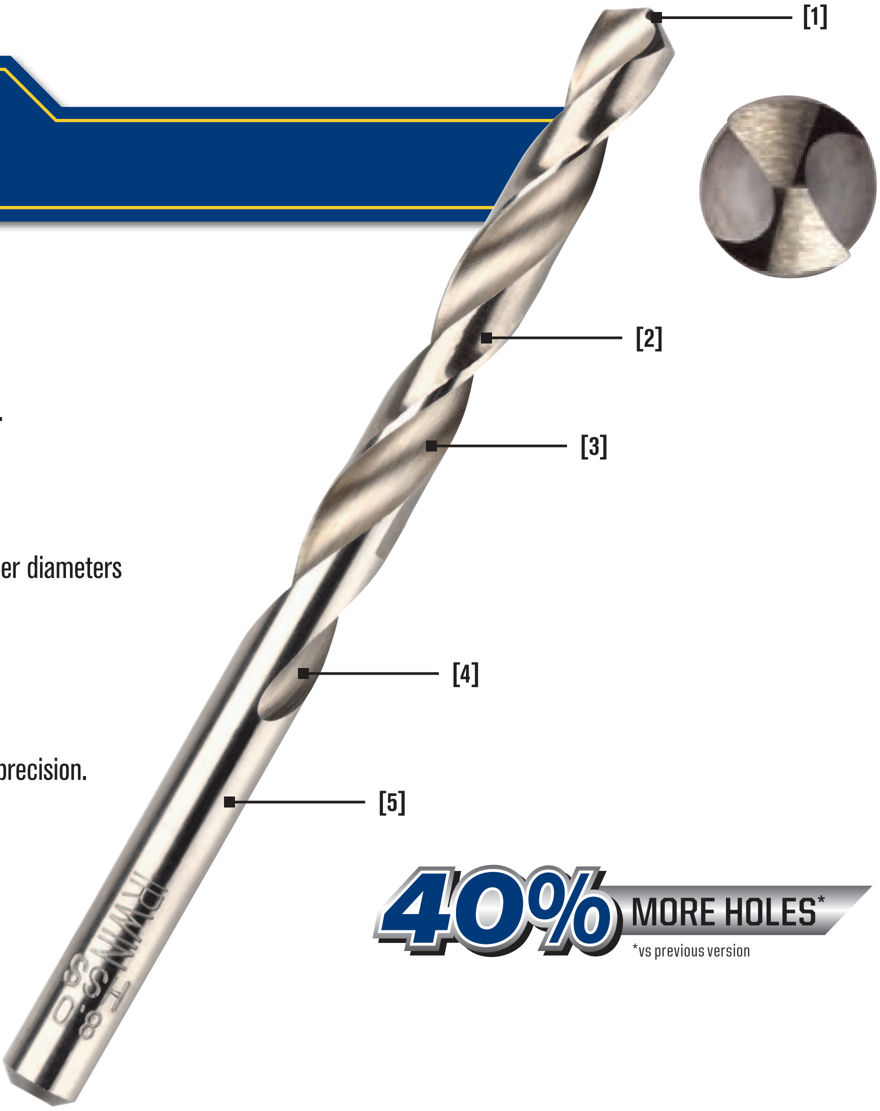
HSS PRO

TOUGHNESS AND PRECISION FOR PROFESSIONAL USERS

The new HSS PRO is an Industrial quality twist drill with outstanding performance and long service life. It is designed for drilling steel and steel castings, alloyed and non-alloyed steel, cast iron, non-ferrous metals, plastics and other materials.
The 118° split point shape provides an optimum centering when starting and a faster drilling rate. It requires lower feed pressure than standard HSS drill bits with a chisel edge.

HSS PRO



1. **118° SPLIT POINT SHAPE**
   With increased performance and very good centering
   – Precision starting, no need to pre-punch or pilot drill.
   – Penetrates quickly.
   – Requires less effort / feed pressure.
2. **GREATEST TOUGHNESS**
   And low risk of breakage even when drilling with smaller diameters due to high elasticity.
3. **OPTIMUM DRILLING PERFORMANCE**
   Even in unfavourable working conditions.
4. **HIGHLY ACCURATE**
   Close tolerances and high concentricity for maximum precision.
5. **HIGHEST STEEL GRADE**
   High-performance, High-Speed Steel.

40% MORE HOLES*

*vs previous version

HSS PRO DRILL RANGE

The HSS PRO drill bits are available in a wide range of variety: DIN 338 jobber series, DIN 340 long series, double-ended stub series, DIN 345 Morse tapper shank series.

DIN 338		DIN 338 series, suitable for many trade and industrial applications in alloyed and un-alloyed steel, non-ferrous metals, cast iron and plastics.
DIN 340		DIN 340 long series, most suitable for drilling deep holes or through hollow profiles.
DOUBLE-ENDED		Double ended series, especially designed for drilling thin materials like sheet metal, flat steel and profiles. Ideal for use with hand-held drills.
DIN 345		DIN 345 Morse taper shank series, strong standard drills for use with stationary drilling machines. High breaking resistance.

HSS PRO

DESIGNED FOR DRILLING A WIDE SELECTION OF MATERIALS

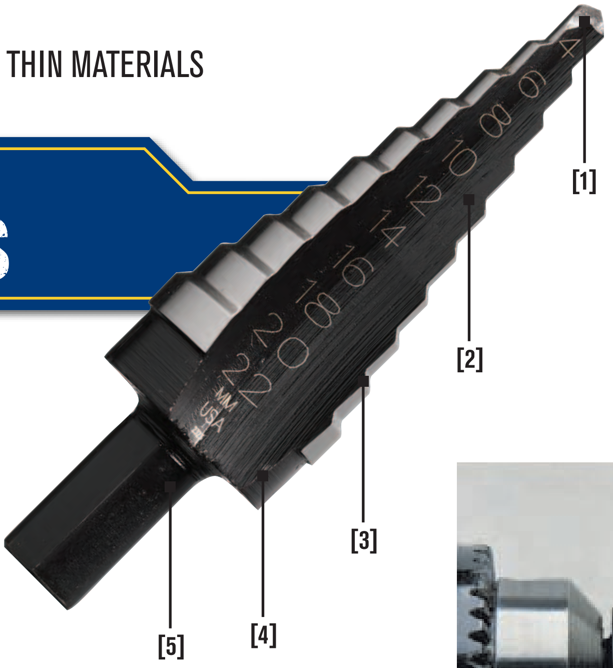
118° CHISEL POINT SHAPE for maximum service life
MORSE TAPER SHANK to Din 345 standard
FOR STATIONARY DRILLING
SURFACE FINISH: Black oxide coating
PACKAGED in Quadro Pack

ON ↔ OFF

STEP DRILLS

DESIGNED FOR PRECISE DRILLING IN THIN MATERIALS

UNIBIT®
STEP DRILLS



1. **SELF CENTERING POINT**
   Will not walk, eliminates centre punching.
2. **DRILL BIT BODY**
   Made from Chrome Vanadium Steel.
   Hardened to 56 HRC.
3. **FLUTE**
   Extra deep ground double flutes
   for extra chip capacity.
4. **IDEAL FOR DRILLING HOLES IN THIN MATERIALS**
   Such as mild steel, copper, brass, aluminium, plexiglass, plastic, wood and laminates.
5. **FLATTED SHANK**
   Prevents the drill bit from slipping in the chuck.

TCT

DESIGNED FOR DRILLING HARD AND ABRASIVE MATERIALS

CARBIDE TIP will drill hardened material up to a hardness of 50 HRC.
Four faceted ground for low drilling pressure and perfect centring
FLUTE Extra deep ground double flutes for extra chip capacity
BODY CLEARANCE Reduced flute land means less friction
DRILL BIT BODY made from Chrome Vanadium Steel. Hardened to 56 HRC
COOLANT should always be used when drilling with TCT Twist Drill Bits.
It is recommended to use a 3-6% emulsion. The coolant will extend the life time of the drill bit

IRWIN®

In 1885, Charles Irwin patented the Auger bit and, along with four business partners, formed the IRWIN® Auger Bit Company in Ohio, USA. Over 125 years later, IRWIN® is still the leading manufacturer of wood drilling bits and accessories. No matter what wood drilling project you face, IRWIN® Tools makes a drill bit that performs the job better. Our mark of quality is stamped right on the shank of our full range of bits. Whether the job requires quick, clean holes, or precise finish work, IRWIN® has a bit for every application and every need.

IRWIN® Blue Groove 4X and Blue Groove 6X wood boring bits raise-the-bar on tool quality and performance. Its cutting edge technology incorporates true "cutting edges" that glide through the wood versus scraping its way through. Professionals can now improve their productivity and accuracy with IRWIN®'s innovatives ranges. The latest generation Blue Groove Power is adding extreme durability thanks to Bi-Metal Technology.

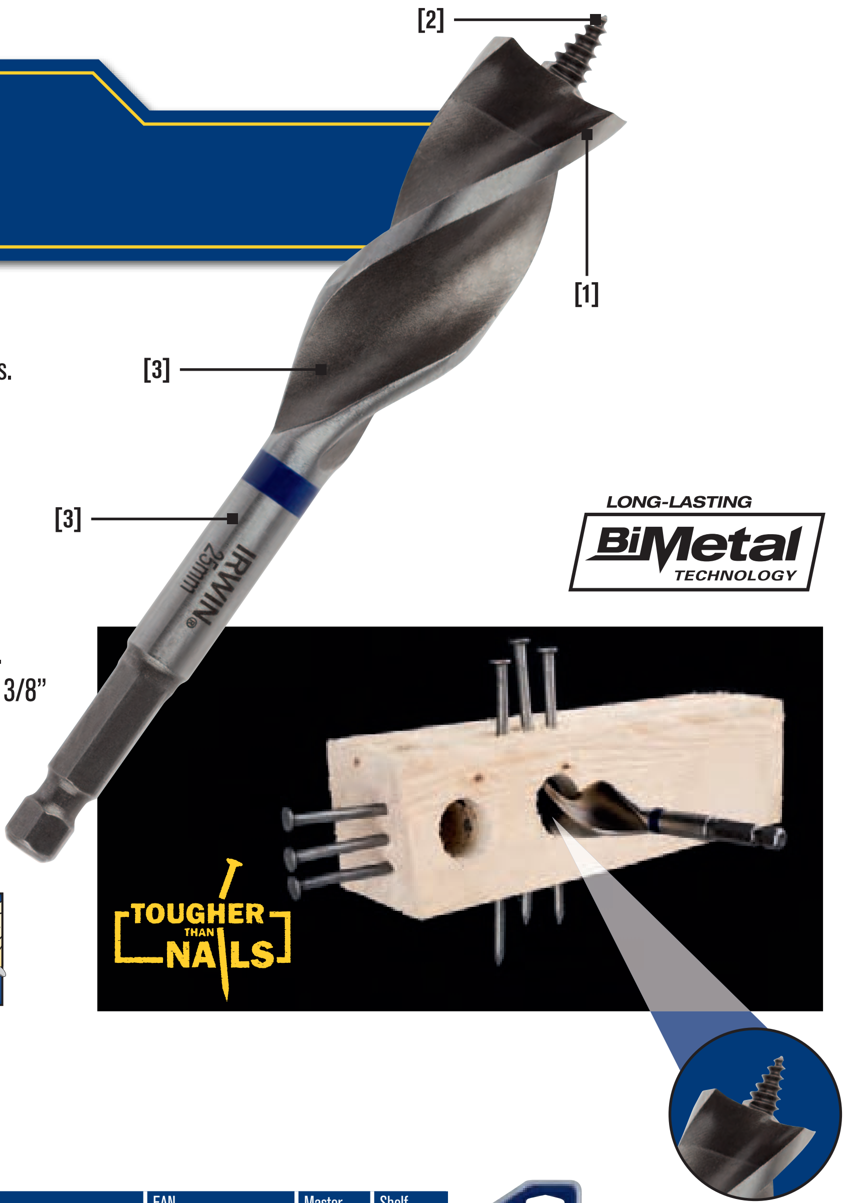
BLUE GROOVE POWER WOOD BORING BITS

THE LONGEST LASTING FLAT BIT EVER!

BLUE GROOVE POWER

1. **EXTREME DURABILITY**
   Bi-metal cutting edges provide long life in tough applications.
2. **FULL SCREW TIP**
   For ease of use and pull through.
3. **TAPERED FLUTE**
   For less binding and ease of use.
   ‘Tri-Flute’ Design For faster chip ejection.
4. **COMPACT LENGTH**
   Designed to fit between studs in most common applications.
   1/4” Quick-Change Shank on Blue Groove Power 14-16mm. 3/8” Quick-Change Shank on Blue Groove Power 18-32mm.



* Up to 6 times faster than competitor products

* Up to 50 times more durable than competitor products.

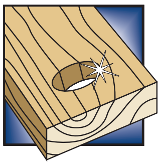
AUGER DRILL BIT EXTENSIONS

Item No.	Description	EAN	Master Pack	Shelf Pack
10502789	5/16" (7,9mm) Extension 450mm for Auger Ø10 - 25mm	5709131134756	25	5
10502790	7/16" (11,1mm) Extension 450mm for Auger Ø26 - 40mm	5709131134756	25	5



Perfect for all types of wood
Creates perfect and straight holes

Brad point tip provides accurate positioning for starting the hole
Bit is precision ground for use in furniture making, doweling, cabinetry and other woodworking applications where an exact hole size is required
Spur cutting edges reduce splintering and ensure a smooth, clean hole
Wide flutes provide a fast, continous flow of chips

BRAD POINT

PRECISE DRILLING OF CLEAN HOLES

IRWIN

IRWIN® Insert Bits are engineered for use in hand-driving applications or with power tools when used with the IRWIN® Insert Bit Holder.

IRWIN® Power Bits are specifically designed for the higher torque requirements of power tools. They are designed to provide more clearance between the power tool & the fastener.

CIRCULAR SAW BLADES

The IRWIN® range of Circular Saw Blades are designed tough for the every day demands of the professional. A blend of precision design and engineering, exacting tolerances and unparalleled production quality is what makes IRWIN® Circular Saw Blades last far longer than conventional blades.

PROFESSIONAL WOOD CIRCULAR SAW BLADES

Alternate Top Bevel tooth grind (ATB).
Optimised for wood cutting

Heat treated blade for extra strength with a hardness of 39 - 45 HRC
Expansion slots to dissipate heat and reduce warping
Industrial grade Tungsten Carbide Tips retain their edge longer and are resharpenable up to 25 times
Corrosion resistant coating for longer quality performance
Alternate Top Bevel tooth grind (ATB) for cross cutting and ripping in all woods

Complying with EN 847-1

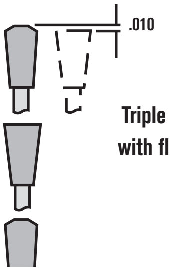
PROFESSIONAL ALUMINIUM CIRCULAR SAW BLADES

Specially designed for cutting all types of non-ferrous metals such as aluminium, copper, lead and plastics.

Hard body blade, hardness 40 - 45 HRC
Negative cutting angle
Flat Top / triple chip grind toothing
Polished, blasted and lacquered blade finish, with K20 quality Tungsten Carbide Tips
Expansion Slots help keep the blade flat

Complying with EN 847-1



Triple Chip tooth grind combined with flat tooth for excellent finish of the cut

PROFESSIONAL MULTI-CUT CIRCULAR SAW BLADES

Extra robust Circular Saw Blades designed for cutting non-ferrous metals and wood with nails.

Hard body blade, hardness 39 - 45 HRC
-1° - 4° Cutting angle
Flat top tooth grind Less aggressive compared to ATB – stronger and more suitable for cutting harder materials
Anti kick-back shoulder design for safer and more comfortable sawing
Expansion slots help keep the blade flat

Complying with EN 847-1

Flat top grind
Higher resistance against concrete remainder or metal particles like nails.

Item No.	Ø mm	Bore mm	No. of Teeth	Reduction Ring	EAN	Master Pack	Shelf Pack

PROFESSIONAL CORDLESS CIRCULAR SAW BLADES

The thin kerf blades are specifically made for cordless circular saws.

Hard body blade, hardness 42 - 48 HRC
Extra thin blade means easier cutting and more cutting per battery charge
Alternate top bevel with Anti-Kick Back
Polished, blasted and lacquered blade with K20 quality Tungsten Carbide tips
Expansion slots help keep the blade flat

Complying with EN 847-1

Alternate Top Bevel tooth grind (ATB) with anti kick-back shoulder. Optimised for wood cutting.

10505928	TURBO 230mm / 22.2mm	5706915059281	30	1

Perfect for clean, precise cutting
Ideal for bricks, ceramic tiles, concrete and other construction materials
Ensure better speed and accuracy then segmented discs

SEGMENTED DIAMOND DISCS

Item No.	Description	EAN	Master Pack	Shelf Pack
10505929	SEGMENTED 115mm / 22.2mm	5706915059298	50	1
10505930	SEGMENTED 125mm / 22.2mm	5706915059304	50	1
10505931	SEGMENTED 150mm / 22.2mm	5706915059311	50	1
10505932	SEGMENTED 180mm / 22.2mm	5706915059328	30	1
10505933	SEGMENTED 230mm / 22.2mm	5706915059335	30	1

Perfect for coarse cutting of big pieces of natural stone
Ideal for materials like concrete blocks, natural stone, construction materials- longer life then Turbo discs
High (7mm) solid diamond segments

CONTINUOUS DIAMOND DISCS

Item No.	Description	EAN	Master Pack	Shelf Pack
10505934	CONTINUOUS 115mm / 22.2mm	5706915059342	50	1
10505935	CONTINUOUS 125mm / 22.2mm	5706915059359	50	1
10505936	CONTINUOUS 150mm / 25.4mm / 22.2mm	5706915059366	50	1
10505937	CONTINUOUS 180mm / 25.4mm / 22.2mm	5706915059373	30	1
10505938	CONTINUOUS 200mm / 25.4mm / 22.2mm	5706915059380	30	1
10505939	CONTINUOUS 230mm / 25.4mm / 22.2mm	5706915059397	30	1

Perfect for ceramic tiles
Ideal performance in stationary machines with cooling water
Ensure very precise and clean cutting in all ceramics

IRWIN

LONG ESTABLISHED MANUFACTURING EXCELLENCE LEADS TO PERFECTION

IRWIN® manufactures and distributes high quality cutting tools for trade professionals who demand superior performance and durability on the job.

Our engineers have been working for almost a century on constant product improvement, resulting in a state-of-the-art in-house electron beam welding process to create the highest quality bi-metal blades that out-perform the competition, stay sharper and last longer.

WITH WELDTEC™

The WeldTec™ platform combines various attributes to deliver long lasting cutting performance.
A revolutionary tooth geometry and an updated tooth set enables faster and smoother cuts, as well as improved longevity

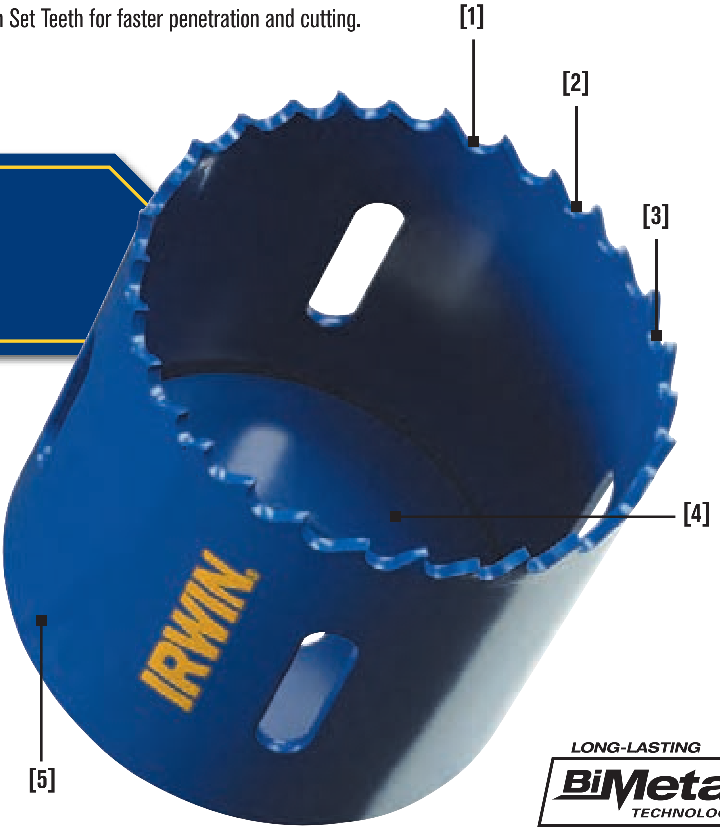
BI-METAL HOLE SAWS

IRWIN® Bi-Metal Hole Saws cut through a variety of materials, including: Aluminium, Copper, Iron, Stainless Steel, Wood and Zinc. Electron Beam welded HSS cutting edge for stronger, longer lasting teeth. Precision Set Teeth for faster penetration and cutting. Bi-Metal Construction for toughness and long life.

WITH WELDTEC™

BI-METAL
HOLE SAWS



1. **WELDTEC™ TECHNOLOGY**
   Delivers enhanced durability and higher cutting speed.
2. **4,5 / 5,5 VARIABLE TPI**
   Faster cuts, less torque build-up and enhanced chip removal.
3. **VARIABLE GULLET DEPTHS**
   For more efficient chip clearance.
4. **THICK BACKING PLATE**
   Gives robustness for the toughest jobs.
4. **BI-METAL CONSTRUCTION**
   For long life and shock resistance.

LONG-LASTING
BiMetal
TECHNOLOGY

NEW TOOTH DESIGN

Up to 100% longer life*
Up to 50% faster cutting*
*vs. previous model

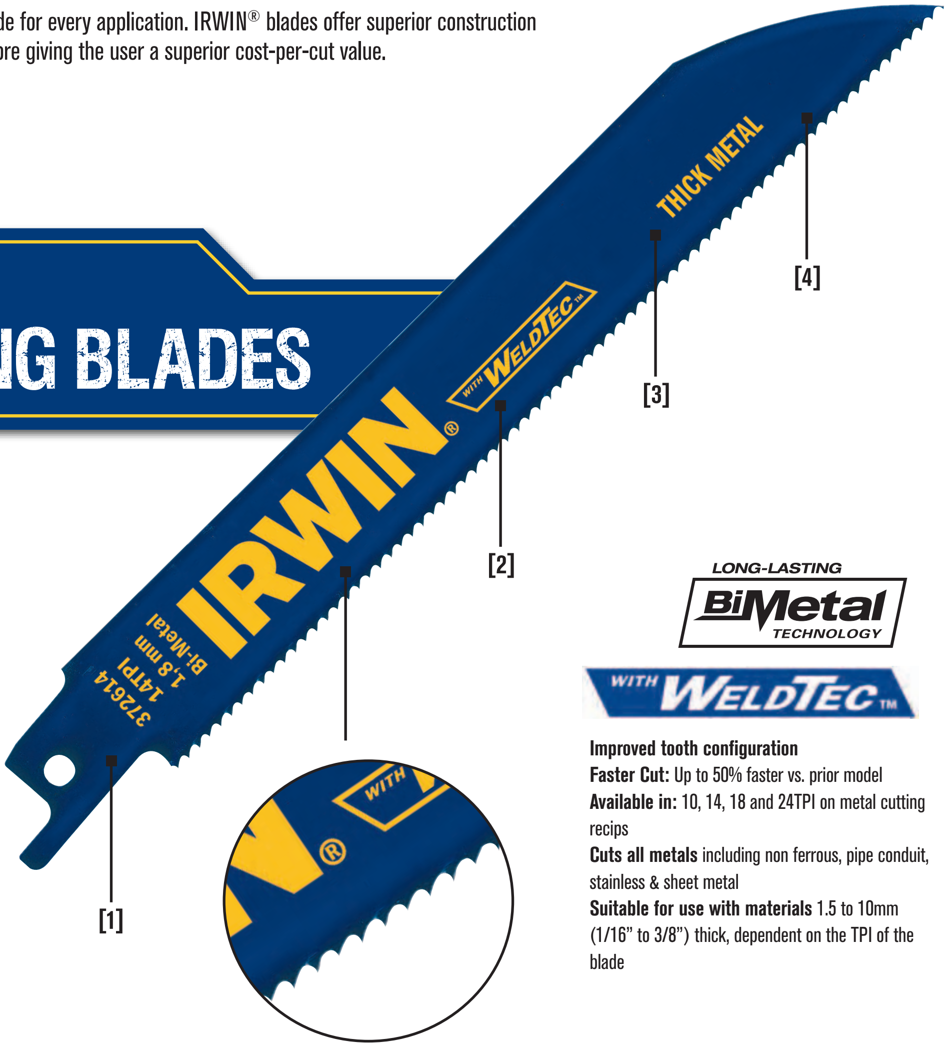
IRWIN

RECIPROCATING SAW BLADES

This comprehensive reciprocating saw blade offering has a blade for every application. IRWIN® blades offer superior construction & design making them faster cutting and longer lasting, therefore giving the user a superior cost-per-cut value.

BI-METAL
RECIPROCATING BLADES



1. **INCREASED TANG ANGLE**
   For up to 50% faster cuts vs prior model.
2. **BI-METAL CONSTRUCTION**
   For a faster cutting, longer lasting blade that can bend without breaking.
3. **8% COBALT**
   Keeps teeth sharper, longer.
4. **ELECTRON BEAM WELD**
   For stronger, longer lasting teeth.

LONG-LASTING BiMetal TECHNOLOGY

WITH WELDTEC™

Improved tooth configuration
Faster Cut: Up to 50% faster vs. prior model
Available in: 10, 14, 18 and 24TPI on metal cutting recips
Cuts all metals including non ferrous, pipe conduit, stainless & sheet metal
Suitable for use with materials 1.5 to 10mm (1/16" to 3/8") thick, dependent on the TPI of the blade

Fast, durable and precise cutting in many masonry materials like clay bricks, limestone or gas concrete.
Universal 1/2" shank

JIGSAW BLADES

This comprehensive jigsaw blade offering has a blade for every application. The range includes both T-shank and U-shank to fit all of today's most popular jigsaw power tool machines.

IRWIN® Jigsaw Blades are manufactured from the following high quality materials:

HCS Carbon steel for use in softer materials such as wood, laminated chipboard, and plastics.

HSS Fully hardened high-speed steel for use in metal, aluminium, and non-ferrous metal.
